1. Identification

1.1. Product identifier
Product Identity: Urea Ammonium Nitrate (UAN) Solution
Alternate Names: ACL-001, UAN Solution 28%, UAN Solution 32%, Urea Ammonium Nitrate (UAN) Solution

1.2. Relevant identified uses of the substance or mixture and uses advised against
Intended use: See Technical Data Sheet.
Application Method: See Technical Data Sheet.

1.3. Details of the supplier of the safety data sheet
Company Name: 7420 Airport Road - Unit 202
Mississauga, ON L4T 4E5
Emergency
24 hour Emergency Telephone No.: AGRICO (MISSISSAUGA) EMERGENCY ASSISTANCE (905) 672-5700
CANUTEC 24 HOUR EMERGENCY 1-888-CAN-UTE (226-8832)
Customer Service: (502)842 2633

2. Hazard(s) identification

2.1. Classification of the substance or mixture
Ox. Liq. 3;H272 May intensify fire; oxidizer.
Eye Irrit. 2;H319 Causes serious eye irritation.

2.2. Label elements

Warning
H272 May intensify fire; oxidizer.
H319 Causes serious eye irritation.
Safety Data Sheet
Urea Ammonium Nitrate (UAN) Solution

Prevention:
P210 Keep away from heat / sparks / open flames / hot surfaces - No smoking.
P221 Take any precaution to avoid mixing with combustibles.
P280 Wear protective gloves / eye protection / face protection.

Response:
P305+351+338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing.
P337+313 If eye irritation persists: Get medical advice / attention.

Storage:

Disposal:
P501 Dispose of contents / container in accordance with local / national regulations.

3. Composition/information on ingredients

This product contains the following substances that present a hazard within the meaning of the Controlled Products Regulations.

<table>
<thead>

[1] Substance classified with a health or environmental hazard.

*The full texts of the phrases are shown in Section 16.

4. First aid measures

4.1. Description of first aid measures

General
In all cases of doubt, or when symptoms persist, seek medical attention.
Never give anything by mouth to an unconscious person.

Inhalation
Remove to fresh air, keep patient warm and at rest. If breathing is irregular or stopped, give artificial respiration. If unconscious, place in the recovery position and obtain immediate medical attention. Give nothing by mouth.

Eyes
Irrigate copiously with clean water for at least 15 minutes, holding the eyelids apart and seek medical attention.

Skin
Remove contaminated clothing. Wash skin thoroughly with soap and water or use a recognized skin cleanser.

Ingestion
If the person is conscious, have them drink water or milk. Contact a physician immediately. Do not induce vomiting.
4.2. Most important symptoms and effects, both acute and delayed
Overview Contact with skin or eyes may cause irritation. See section 2 for further details.
Eyes Causes serious eye irritation.

5. Fire-fighting measures

5.1. Extinguishing media
Use media needed to control surrounding fire. Water content of product prevents ignition. The product can support combustion if water evaporates.

5.2. Special hazards arising from the substance or mixture
Hazardous decomposition: Combustion: oxides of nitrogen and carbon, ammonia, ammonium compounds, cyanide compounds, biuret. When the water in UAN evaporates, it leaves a residue of solid ammonium nitrate and urea; solid ammonium nitrate can explode.
Keep away from heat / sparks / open flames / hot surfaces - No smoking.
Take any precaution to avoid mixing with combustibles.

5.3. Advice for fire-fighters
Avoid welding or burning on pipes, valves, or tanks, which have contained UAN solution until they have been thoroughly washed out. Residual ammonium nitrate may explode under conditions of confinement and high temperature.
Wear self-contained breathing apparatus and protective clothing.
ERG Guide No. ---

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
Put on appropriate personal protective equipment (see section 8).

6.2. Environmental precautions
Do not allow spills to enter drains or waterways.
Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

6.3. Methods and material for containment and cleaning up
EMERGENCY ACTION: Keep unnecessary people away, and isolate hazard area.
SMALL SPILLS: Stop leak, if you can do so without risk. Collect product for recovery and use as a fertilizer.
LARGE SPILLS: For release to land, contain discharge by constructing dykes or applying inert absorbent. Keep out of streams. Check for contamination of drinking water supply. Notify applicable government authority if release is reportable or could adversely affect the environment.
7. Handling and storage

7.1. Precautions for safe handling
Handle containers carefully to prevent damage and spillage.
May be toxic to cattle (ruminants) when ingested. Practically non-toxic to aquatic life (> 103 mg/L 9 hours LC50 Fish)
See section 2 for further details. - [Prevention]:

7.2. Conditions for safe storage, including any incompatibilities
Store in a tightly closed container. Protect from freezing. Avoid heat, flames, sparks and other sources of ignition and do not allow material to become dry. Do not use zinc or copper (brass, bronze, etc.) alloys in contact with nitrogen solution. Also, cast iron, malleable iron or ductile iron is much more susceptible to corrosion than aluminum or carbon steel. Be especially wary of plugs and fittings on storage tanks made from these materials.
Incompatible materials: Avoid contact with combustible, organic or other readily oxidizable materials. Avoid contact with strong acids and chlorates or other strong oxidizers. Avoid heat, sparks and other sources of ignition. UAN will form urea nitrate when mixed with nitric acid at low pH; urea nitrate may become unstable and/or explosive under certain conditions. Contact with alkaline materials may liberate ammonia. Corrosive to brass and copper.
See section 2 for further details. - [Storage]:

7.3. Specific end use(s)
No data available.

8. Exposure controls and personal protection

8.1. Control parameters

<table>

8.2. Exposure controls

Respiratory If workers are exposed to concentrations above the exposure limit they must use the appropriate, certified respirators.
Eyes
Wear splash goggles, if exposed to splashing liquids.

Skin
Rubber coated gloves and suitable clothing to minimize skin contact are recommended.

Engineering Controls
Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.

Other Work Practices
Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

See section 2 for further details.

9.2. Other information
No other relevant information.
10. Stability and reactivity

10.1. Reactivity
Hazardous Polymerization will not occur.

10.2. Chemical stability
Stable under normal circumstances.

10.3. Possibility of hazardous reactions
No data available.

10.4. Conditions to avoid
No data available.

10.5. Incompatible materials
Avoid contact with combustible, organic or other readily oxidizable materials. Avoid contact with strong acids and chlorates or other strong oxidizers. Avoid heat, sparks and other sources of ignition. UAN will form urea nitrate when mixed with nitric acid at low pH; urea nitrate may become unstable and/or explosive under certain conditions. Contact with alkaline materials may liberate ammonia. Corrosive to brass and copper.

10.6. Hazardous decomposition products
Combustion: oxides of nitrogen and carbon, ammonia, ammonium compounds, cyanide compounds, biuret. When the water in UAN evaporates, it leaves a residue of solid ammonium nitrate and urea; solid ammonium nitrate can explode.

11. Toxicological information

Acute toxicity
Note: When no route specific LD50 data is available for an acute toxin, the converted acute toxicity point estimate was used in the calculation of the product’s ATE (Acute Toxicity Estimate).

</tr>
</tbody>
</table>

12.2. Persistence and degradability
When released to soil, urea will hydrolyze into ammonium in a matter of days to several weeks. When released into water, this material may biodegrade to a moderate extent. When released into water, urea is expected to evaporate significantly bioaccumulation. When released into the air, urea is expected to be readily degraded by reaction with photochemically produced hydroxyl radicals. When released into the air, urea is expected to have a half-life of less than 1 day.

12.3. Bioaccumulative potential
Not Measured

12.4. Mobility in soil
No data available.

12.5. Results of PBT and vPvB assessment
This product contains no PBT/vPvB chemicals.

12.6. Other adverse effects
No data available.

13. Disposal considerations

13.1. Waste treatment methods
Whatever cannot be saved for recovery or recycling should be managed in appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

15. Regulatory information

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all of the information required by those regulations.

Components are DSL Listed, NDSL Listed and/or are exempt from listing.

| WHMIS Classification | D2B C |

16. Other information

SDS Revision Date: 02/21/2017

The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind, expressed or implied, is made with respect to the information contained herein. We accept no responsibility and disclaim all liability for any harmful effects which may be caused by exposure to our products. Customers/users of this product must comply with all applicable health and safety laws, regulations, and orders.

The full text of the phrases appearing in section 3 is:

H272 May intensify fire; oxidizer.
H319 Causes serious eye irritation.

The information contained herein is furnished without warranty of any kind. The above information is believed to be correct but does not purport to be all inclusive and should be used only as a guide. Users should make independent determinations of the suitability and completeness of information from all sources to assure proper use and disposal of these materials and the safety and health of employees and customers.
